Professional Experiences

IBM Solutions Delivery Philippines

UP Ayala Land Technohub, Don Mariano Marcos Ave., Diliman, Quezon City, Manila

February 2026 to May 2026

Internship

- Improved my technical skills in test automation, particularly in using Selenium for automated testing and documentation.
- Improved my knowledge in programming languages such as Java and gained better familiarity with GitBash commands and version control workflows.
- Developed stronger problem-solving, communication, adaptability, and teamwork skills by working in a professional IT environment.
- Handling tasks independently, managing deadlines, and understanding industry-standard practices in software testing and system development.
- Received the IBM Best Improved Award 2026 in recognition of improvement, dedication, and performance during the internship at IBM Solutions Delivery Philippines.

88 Hotspring Resort And Hotel

National Highway, Bagong Kalsada St., Calamba, 4030, Laguna

June 2026 to July 2026

Web Developer - Parttime

- Improved my technical skills in web development by conceptualizing and developing an ordering system for 88 Hotspring Resort and Hotel, including its core concept, functionality, and implementation.
- Designed and implemented user-friendly ordering workflows to streamline the process of submitting and managing customer orders.
- Developed and integrated system functionalities based on the resort's operational needs, demonstrating initiative in identifying opportunities to improve business processes through technology.
